

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) An improved apple/potato peeler, comprising:
- a base;
  - a main frame mounted to a slightly L-shaped structure on said base;
  - a rotatable and axially movable screw horizontally supported on a screw support member on a vertical frame member disposed at the rear of said main frame;
  - a 3-prong fork fixed to the end of said screw;
  - a guide piece pivotally front mounted on said vertical frame member and being releasably engageable relative to a screw channel of said screw;
  - a resiliently movable peeling arm fore-and-aft swingeably pivoted to the front part of the horizontal frame member of said main frame;
  - a U-shaped peeling blade fixed to the upper end of said movable peeling arm by means of a blade positioning device; [[and]]
  - a coring/slicing blade fixed to the front end of said horizontal frame member for cutting flesh of a vegetable or fruit held by the 3-prong fork of said screw into continuous spiral slices and coring said vegetable or fruit; ~~characterized in that:~~
    - an annular blade for coring at the upper end of said ~~coring-slicing~~ coring/slicing blade is inlaid within a centering cylinder having at the center thereof located with a small-caliber center through hole aiming exactly at the center of the prong 3-prong fork ~~32~~ and through the center through hole of said centering cylinder is passed a center pin with one end inserting into a central indent of said prong 3-prong fork and the other end penetrating through said center through hole of said centering cylinder; and
